

Quick Start

13.3" Indoor Epaper Display (E Ink)

4 Easy Usage Options:

- 1. Power On & Play:** Using the power supply provided simply plug in the power. There is no on/off. After about 60 seconds the image will change and then the preloaded playlist will run.
- 2. Change the images displaying:** Plug the USB memory stick supplied into the display as well as the power. Pre-loaded sample images will auto-install. After about 2 minutes remove the USB memory stick and the new playlist will play.
- 3. Create & copy new images via USB:** Using the EP Demo App for Windows included on the USB memory stick provided, create or load a new 1600x1200 pixel image onto the USB memory stick and repeat step (2) above.
- 4. Create & copy new images via Ethernet:** Using the EP Demo App for Windows and with the Ethernet to USB adaptor plugged into the display. Create or load a new 1600x1200 pixel image using the Network button option in the EP Demo App.

Instructions

Instructions for the Windows EP Demo App are on the supplied USB memory stick as well as available for download on:
